

Edna Trepanier's Bio

Please provide a brief summary of your professional experience.

Dr. Edna Trepanier began her professional life in the Philippines where she received a Bachelor of Science in Chemistry in 1978 and worked as a research chemist and associate professor at different universities while working on her Master of Science in Chemistry. She continued to search for knowledge and pursued her childhood dream of becoming a nurse and graduated with a BSN in 1990.

In 1992 she moved to the United States and has practiced nursing in medical, surgical, telemetry, and critical care areas. Dr. Trepanier accepted the position of nurse manager at Memorial Regional Hospital in 2002, a level 1 trauma center in Hollywood, Florida where she continues to lead and inspire. Dr. Trepanier holds a Master of Science in Nursing and Master in Business Administration with special concentration on Health Care Management and a Ph.D. in Nursing at the University of Phoenix, where she published her study on the Impact of Communication Training on Nurses' Verbal and Nonverbal Skills and Patient satisfaction. She also published articles on diabetic foot. Dr. Trepanier is the sole author of two laboratory manuals: Inorganic Chemistry Laboratory Manual: Part I and Inorganic Chemistry Laboratory Manual Part II.

Dr. Trepanier served as an associate professor at University of Phoenix, South Florida campus and is currently an adjunct faculty at Broward College. She sits on the Community Advisory Board Committees for the graduate school of nursing at Keiser University, BSN at Broward College, and the undergraduate nursing program of Chamberlain University. Dr. Trepanier lectures at both local and national level. She has been recognized by Memorial Healthcare System for her steadfast commitment to quality patient care, excellent customer service, and exceptional employee satisfaction.

Dr. Trepanier is an inspirational leader and mentor who embodies life-long learning and a commitment to safe quality patient care.
